DETAILED ACTION

This Examiner's Reasons for Allowance action is in response to the filing of 06/25/2009.

Allowance

1. Claims 2-12, 14-18, 20-30, 32, 33, 35, 36 & 38-41 have been cancelled.
2. Claims 1, 13, 19, 31, 34, 37, 42 & 43 have been amended with written arguments which overcome the examiner's prior rejections and objections, see paper of 03/25/2009. Examiner withdraws all outstanding rejections and objections to claims 1, 13, 19, 31, 34, 37, 42 and 43.
3. Claims 1, 13, 19, 31, 34, 37, 42 & 43 are allowed.

Examiner's Statement of Reasons for Allowance

4. Prior art was found which disclosed Windows NT password hash retrieval [e.g. Allison ("pwdump")] and authentication system using one-time passwords [e.g. Guski et al. (US-5592553-A)] and protecting the confidentiality of passwords in a distributed data processing system [e.g. Kaufman et al. (US-5418854-A1)] and NIS+password update protocol [e.g. Prafullchandra (US-5734718)].
5. The following is an examiner's statement of reasons for allowance:
 - The prior art of record does not teach or render obvious the limitations as recited in independent Claims 1, 13, 19, 31, 34, & 37, specific to "the software application signs on to the database using the user name and a database password" and "obtaining, at the

launcher application and in response to the request, a file dump associated with the database and comprising an encrypted database password” and “the encrypted database password is the database password encrypted using a public encryption key provided by a vendor of the software application” and “the encrypted database password is generated by the software application before receiving the request” and “signing on to the database, using the launcher application, with the user name and the database password to obtain a temporary user name” and “the user name has access to a set of data and functions in the database” and “the temporary user name is restricted to a subset of the set of data and functions” and “the subset has less data and fewer functions than the set” and “accessing the database, using the database tool, to obtain the file stored in the database” and “the database tool is separate from the launcher application” and “initiating, using the launcher application after receiving the request from the user, a signon attempt to the database with a defective signon” and “the database generates the file dump in response to the signon attempt” and “creating a file dump comprising the encrypted password in response to the failed signon attempt” and “sending the file dump to the launcher application”.

- Dependent claims are allowed as they depend from an allowable independent claim.
- Therefore, the Examiner considers both the combination of the above limitations with the remaining limitations as found in each of the independent claims as applied to recovery access to secure data in a database as the non-obvious novelties of the invention.

Art Unit: 2436

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
